## M9220 Series Electric Spring-Return Actuators

## Description

The M9220-xxx-3 actuators are direct-mount, spring-return electric actuators that operate with these available power options:

- AC 24 V at $50 / 60 \mathrm{~Hz}$ or DC 24 V
(AGx, BGx, GGx, HGx)
- AC 120 V at $60 \mathrm{~Hz}(B A x)$
- AC 230 V at $50 / 60 \mathrm{~Hz}$ (BDx)

These bidirectional actuators do not require a damper linkage, and are easily installed on dampers with $1 / 2$ to $3 / 4 \mathrm{in}$. or 12 to 19 mm round shafts, or $3 / 8$ and $1 / 2$ in. or 10,12 , and 14 mm square shafts using the standard shaft clamp included with the actuator. An optional M9220-600 Jackshaft Coupler Kit is available for $3 / 4$ to 1-1/16 in. or 19 to 27 mm round shafts, or $5 / 8$ and $3 / 4 \mathrm{in}$. or 16,18 , and 19 mm square shafts.
A single M9220-xxx-3 Electric Spring-Return Actuator provides a running and spring-return torque of $177 \mathrm{lb} \cdot$ in ( $20 \mathrm{~N} \cdot \mathrm{~m}$ ). Two or three models mounted in tandem deliver twice or triple the torque. Integral line voltage auxiliary switches are available on the -xxC models to indicate end-stop position or to perform switching functions within the selected rotation range.
Refer to the M9220-xxx-3 Electric Spring-Return Actuators Product Bulletin (LIT-12011057) for important product application information and single point of contact information.

## Features

- Available torques of $177 \mathrm{lb} \cdot \mathrm{in}(20 \mathrm{~N} \cdot \mathrm{~m})$ for single actuators, $354 \mathrm{lb} \cdot$ in ( $40 \mathrm{~N} \cdot \mathrm{~m}$ ) for two models, and $531 \mathrm{lb} \cdot$ in ( $60 \mathrm{~N} \cdot \mathrm{~m}$ ) for three models mounted in tandem-offer a selection that is most suitable for the application.
- Reversible mounting design—simplifies installation and enables the actuator to spring return in either direction.
- Electronic stall detection throughout entire rotation range-extends the life of the actuator by deactivating the actuator motor when an overload condition is detected.
- Removable coupler-adapts to a shorter damper shaft.
- Integral 48 in. ( 1.2 m ) halogen-free cables with colored and numbered conductorssimplify field wiring.
- Integral auxiliary switches (xxC Models)— provide one fixed and one adjustable switch point with line voltage capability.
- NEMA 2 (IP54) rated aluminum enclosure-protects the internal components of the actuator from dirt and moisture.
- Easy-to-use locking manual override with auto release and crank storage-allows for manual positioning of the actuator hub.
- Integral connectors for 3/8 in. flexible metal conduit-simplify installation and field wiring.
- Microprocessor-controlled brushless DC motor (-AGx, -GGx, and -HGx types)provides constant run-time independent of torque.

M9220 Series Electric Spring-Return Actuator

## Applications

The M9220-xxx-3 Electric Spring-Return Actuators provide reliable control of dampers and valves in HVAC systems. The M9220-xxx-3 Actuators are available for use with on/off, floating, and proportional controllers.

## Repair Information

If the M9220 Series Electric Actuator fails to operate within its specifications, replace the unit. For a replacement actuator, contact the nearest Johnson Controls $®$ representative.
